OBJECTIVE

Final-year Computer Science Engineering student specializing in Cybersecurity, passionate about protecting digital infrastructures and detecting emerging threats. Skilled in network security, SOC monitoring, and digital forensics, with hands-on experience in threat detection automation and incident analysis. Eager to contribute innovative security solutions, strengthen organizational resilience, and grow within a Security Operations or Vulnerability Management environment.

INTERNSHIPS & EXPERIENCE

Software Engineer Intern Cloud Security & Automation <i>Oratio Technologies</i> - Automated Azure resource provisioning using Python and IaC, optimizing deployment efficiency and enforcing secure access controls. - Enhanced cloud security posture by migrating credentials to Azure Key Vault and improving documentation for DevSecOps workflows. Technologies: Azure, Azure Key Vault, Python, GitHub, Jira, IaC	07/2025 – 09/2025 Remote
Cybersecurity Intern Automated Threat Detection <i>Sotupub</i> - Built an automated threat detection pipeline integrating OTX and AbuseIPDB feeds with internal logs for real-time malicious IP monitoring. - Developed a Flask dashboard for detection analytics and alerts, showcasing expertise in automation, data processing, and incident response. Technologies: Python, Flask, SQLite, Regex, n8n, OTX, AbuseIPDB	07/2025 – 08/2025 Sousse, Tunisia
Cybersecurity Instructor CompTIA Security+ <i>GoMyCode</i> - Train 30+ students on network security, cryptography, SIEM, and risk management, designing realistic labs to build hands-on cybersecurity skills. - Simplify complex concepts into engaging sessions, improving learners' technical confidence and certification readiness. Technologies: Kali Linux, Wireshark, IDS/IPS, SIEM	02/2025 – Present Sousse, Tunisia

EDUCATION

Computer Science Engineering, specializing in Cybersecurity <i>École Polytechnique de Sousse</i>  Relevant Courses: Network Security, Operating Systems Security, Cryptography, Ethical Hacking, Digital Forensics, IDS/IPS, VPN/SSL, IAM, SOAR, FortiSIEM, FortiManager	2023 – Present Sousse, Tunisia
Computer Science Degree <i>Higher School of Sciences and Technology of Hammam Sousse (ESSTHS)</i>  Relevant Courses: Data Structures & Algorithms, Database Management Systems, Web/Mobile Development, Object-Oriented Programming (OOP)	2020 – 2023 Tunisia

TECHNICAL SKILLS

AI & Data Analysis Python (Pandas, NumPy) · Data Cleaning & Processing · Regex Automation · SQL Querying & Analysis	Cybersecurity & Monitoring Suricata · Snort (IDS/IPS) · SIEM & Log Correlation · Threat Intelligence (OTX, AbuseIPDB) · SOAR
Forensics & Incident Response The Sleuth Kit (TSK) · Autopsy · Network Traffic Analysis · Log Investigation & Evidence Preservation	Network Security VPNs (IPsec, SSL) · PKI & Digital Certificates · OpenSSL · Secure Network Configuration
Development & Cloud Tools Git & GitHub (Version Control) · Flask (Web App Development) · Java & Spring Boot · Azure Cloud (IaC, Key Vault)	

CERTIFICATES

Information Technology Specialist in Python
Certiport - A Pearson VUE Business

IEEE Region 8 WIE

LEADERSHIP & VOLUNTEERING

IEEEXtreme

Tunisia Section lead 18.0 & 19.0 edition

Coordinated the national strategy, promotion, and technical support for Tunisia's participation in the global 24-hour programming competition, managing a network of universities and over 1000 participants.

IEEE Tunisia Section

WIE Student Affinity Groups Coordinator

Organized nationwide mentoring programs and technical workshops to foster collaboration and professional development among women engineering students across Tunisia.

CYBERSECURITY PROJECTS & LABS

SIEM & IDS/IPS Implementation

Configured and optimized Suricata and Snort for network threat detection, integrating them with an ELK Stack for real-time log analysis and visualization. Improved detection accuracy and gained hands-on experience in incident monitoring and alert correlation.

Network Forensics

Performed disk and file system forensic analysis on a simulated compromised machine using The Sleuth Kit (TSK) and Autopsy. Identified traces of malicious activity and developed a systematic approach to evidence collection and reporting.

Secure Network Architecture

Designed and configured a secure SSL VPN and web access portal via FortiGate, simulating remote access to internal corporate services. Strengthened understanding of network segmentation, encryption, and access control principles.

ADDITIONAL EXPERIENCE

Full Stack Developer Intern

02/2023 – 07/2023

Satoripop

Built a scheduling platform with Spring Boot and AngularJS.

Back End Developer Intern

07/2022 – 08/2022

Proxym IT

Developed a library management service with Java and Spring Boot.
